Even though we at Pain Specialists of America are committed to compassionate care, we must exercise proper due diligence when prescribing opioid analgesics for chronic pain. Prescription drug abuse has reached epidemic proportions in our society. Therefore, our clinic policy is that an appropriate workup must be completed prior to the dispensing of an opioid prescription. This workup will include review of previous pharmacy/clinic records, evaluation by diagnostic and laboratory tests, and acceptable completion of a urine drug screen yielding expected results. Common examples of opioid analgesics include hydrocodone, morphine, oxycodone, fentanyl, opana, and methadone. Prescriptions for these medications will not be given at an initial visit.

- Please bring your driver's license and insurance cards along with your **completed** new patient paper work to your scheduled appointment. Payment for services are expected at the time of service (co- pays, co-insurance, private pay). We accept cash, check, money order and credit cards (Visa, American Express, MasterCard, and Discover).
- **If you have been instructed to obtain imaging reports and/or films by our staff, please bring them to your appointment. Our office requires these as part of your consultation. If we do not have your films at the time of your appointment, you may be rescheduled.**
- Your initial visit at Pain Specialists of America is a consultation. If a doctor referred you for an injection, you must be seen for an office visit first. Procedures are scheduled after the initial consultation.
- If English is your second language, please make arrangements for someone to accompany you to your visit who can translate in order to provide you with the best healthcare service. We want you to fully understand your diagnosis and prognosis and have any questions you may have answered.

We wish to make your visit as comfortable as possible, so please do not hesitate to contact us if you have any questions at the numbers listed above.
