

Dear Patients,

We are offering in-network rates to you per our letter below.  
Please speak to one of our staff members if you have any questions.

TO WHOM IT MAY CONCERN:

The Ambulatory Surgery Center of Killeen (“ASCK”) is a state licensed, Medicare/AAAHC certified ambulatory surgery center located in Killeen, Texas, which is related by common ownership to The Pain Relief SurgiCenter (“TPRS”) of Austin, Texas, an in-network participating ASC provider with your company. ASCK was recently approved to participate in the Medicare program, and has now begun the process of applying for in-network status with your company and other payers serving the residents of Bell County. However, until ASCK can be approved for in-network status, it is considered out-of-network.

Notwithstanding ASCK’s current out-of-network status, it is ASCK’s intent to bill both your company and its beneficiaries as an in-network provider. This means that ASCK will use the same in-network fee schedule as TPRS, and will accept the same level of reimbursement as TPRS. ASCK will also accept in-network patient cost-sharing amounts from your beneficiaries. ASCK is eager to become a participating in-network facility and, as such, is willing to accept in-network reimbursement during the pendency of its application with your company.

I thank you for your time and consideration.

Sincerely,

Administration
